

TECHNOLOGY MADE OF WIRE

LESSMANN
DRAHTBÜRSTEN · WIRE BRUSHES

The new **ROKI^{DBGM}**
with a new designed handle.

2005

The LESSMANN brake caliper brush ROKI has been improved according to the latest ergonomical aspects with a 2-components-handle. The new handle will make it much easier for you to clean brake calipers as you will have much more grip with it. With this high quality brush you will feel the difference in all kind of application.

The new shaped ROKI follows the trend in hand tools: high quality ergonomically optimised handles. For minimum order quantities we can arrange your own private label solution. Moreover our ROKI has a registered design and it is 100% Made in Germany.

As of September the new ROKI brush will be on stock. We would be very pleased to receive your orders!
